Response to a Final Office Action

Application SN. 10/782,454

This communication is a response to a FINAL Office Action having a mailing date of 09/20/2005 and setting forth a shortened statutory period for response of three months which would expire on 12/20/2005.

The applicant has studied the examiner's detailed Action carefully including a telephone interview with the examiner of record in this case on 09/26/2005. A reference to the telephone conversation will be made as the applicant's remarks continue.

Listing of the Claims:

There seems to be a confusion as to the proper list of claims. Therefore, the listing of the last submitted claims 1 - 5 will be included in this communication together with proper status identifiers and other requirement Of 37 CFR 121.1.

Title of the Invention:

In order to avoid any further discussions about the length of the title, the applicant hereby adopts the title suggested by the examiner.

Abstract:

The abstract will be amended as is suggested by the examiner.

Drawing Objections:

The applicant reiterated to the examiner that the applicant is fully aware that the new drawing submissions must be properly identified. This is quite possible when the drawings are being mailed. However, when the replacement drawings are being faxed, the front of the drawings must be marked which runs into the prohibition that no written material can appear on the front of the drawings.; The examiner suggested "small print" in the margin of the drawings. This will be done in the new submission of the drawing with this FAX.
